

CONTAMINATION

PAPER

RECYCLING

Just a sample of the trash that was dropped off by our residents with their paper materials, at the Recycling Center at 1316 Hilltop Road in Leesport. Sixteen pounds of trash was removed from 1,200 pounds of paper that was dropped off for recycling. This type of contamination is the reason recycling programs, throughout the United States, are being terminated.

The items in the photo to the left are not paper and should never be put in the paper bin for recycling.

Please make sure that only paper materials are placed in the paper container. Please remove all trash, plastic bags and other contaminants before recycling.

If you have any question on an item for recycling, please take it home with you and dispose of it in your normal trash until you can get confirmation.
