

SharePoint Instruction Guide

Hiding the 'Title Bar' in a List

The title bar is the column descriptions of your list. If you prefer these not to show you may:

1. Add a web part and select the **Content Editor Web Part**.
2. Click **edit** and select **Modify the webpart**
3. Click on **Source Editor**
4. Paste the following code:

```
<style>  
.ms-viewheadertr { display: none;}  
</style>
```

5. Click **OK** on the source editor window.
6. Click **OK** on the content editor window.

Once you arrange your page (if you have not done so already) you may publish your page.
