

## INTERSECTION SIGHT DISTANCE

Maintaining adequate sight distance for motorists is a concern at all Richmond Township intersections. This is of particular concern in agricultural areas where seasonal crops can create significant short-term sight obstructions. For those that grow agricultural crops, please respect the public right-of-way along the roadways and especially at intersections. A clear line of sight must be maintained to keep our roads safe. We ask that you voluntarily take this into consideration during spring planting. Note that voluntary compliance to this request will preclude consideration of more serious action.

The sketch below has been prepared to assist you in understanding the scope of this request.
